

Technical Assistance & Training

Over the past several decades, JGC Group has conducted various engineer training programs and technical assistance programs at plant sites and remote locations. Many of our clients have achieved considerable improvements in their employee skills and plant operations which significantly contribute to the profitability and efficiency of their business.

Onsite Assistance (Residential/On-call)

Do you have any of these issues?

- ☹️ **Lack of experienced engineers and technicians**
- ☹️ **Need specific expertise**
- ☹️ **Need technical problem-solving teams when in trouble**

Our Solutions

- Dispatch customized teams, experts, and operation and maintenance staff to the operation site to meet the client's needs.
- Select the most suitable resources from JGC network for client's situation over a long period of time or even within a short period of time.
- The dispatched teams and crew will work as an integrated resource with client's operating organization, or work as an independent task force team.

Our Approach

Our Strengths

- A wide variety of global human resources networks allow flexible use of experienced and knowledgeable experts
- Cooperation with specialized teams at headquarters with expertise from various EPC and Operational Excellence services
- Stand by various experts who can solve problems quickly

Our Experiences

30+

Years in Global Market

Middle East
North Africa
West Africa
Southeast Asia

**Various
Type of
Facilities**

Gas Processing
Oil Producing
FPSO
Integrated Water, Steam,
Power Plant, etc.

Asset & Operation Due Diligence

Do you have any of these issues?

- ☹️ **Considering investment for operating assets**
- ☹️ **Audit for operation and maintenance of operating assets**

Focus Areas

- **Facility design and construction** in accordance with recognized and generally accepted engineering practices
- Implementation of **Process Hazard Analysis**
- Established **Operation Manual**
 - ✓ Startup and Shutdown
 - ✓ Normal operations
 - ✓ Emergency Operations
- Deployment of **safe work practices**
- **Written procedures** for maintenance, inspections and testing
- Rigorous **quality assurance** systems
- **Training and competency** management system

Asset & Operation Management Framework

1. Management Leadership

2. Risk Assessment

4. Facility Design and Construction

5. Information & Documentation

Maintenance

3. Management of Change

7. Mechanical Integrity

8. Contractors

9. Occupation Health and Safety

Operation

6. Operation Procedure

10. Training

Emergency Response

11. Incident Investigation

12. Emergency Planning and Response

14. Assessment & Improvement

Example of JGC's PSM Assessment Checklist

No.	Requirement	Guideline for Compliance	Observation	Opportunities / Comments
5.0	In accordance with the schedule set forth in [paragraph 3.1] of this section, the employer shall complete a compilation of written process safety information before conducting any process hazard analysis required by the standard. The compilation of written process safety information is to enable the employer and the employees involved in operating the process to identify and understand the hazards posed by those processes involving highly hazardous chemicals. This process safety information shall include information pertaining to the hazards of the highly hazardous chemicals used or produced by the process, information pertaining to the technology of the process, and information pertaining to the equipment in the process.	1. A procedure to manage PSI defined in the paragraph 2.1 through 2.3 should be developed. - Information applicable as PSI should be clearly defined in the procedure. - Management process of PSI, including roles & responsibilities of owners should be developed. - PSI should be periodically updated according to Management of Change processes. (Refer to Element-10)	Observations found during the interview will be described in this column.	
5.1	Information pertaining to the hazards of the highly hazardous chemicals shall include: i. Toxicity data; ii. Reactivity data; iii. Corrosivity data; iv. Thermal and chemical stability data; and vii. Hazardous effects of inadvertent mixing of different materials that could foreseeably occur. Note: Safety data sheets meeting the requirements of 29 CFR 1910.1200(g) may be used to comply with this requirement to the extent they contain the information required by this subparagraph.	1. F... TLV: Threshold Limit Value TWA: Time Weighted Average STEL: Short Term Exposure Limit TLV-C: Threshold Limit Value Ceiling IDLH: Immediately Dangerous to Life or Health 2. Material Safety Data Sheet (MSDS) should be used to include the information. - All MSDS should be supplied from manufacturers and compiled. 3. When a contractor brings highly hazardous chemicals to the plant then the contractor shall show MSDS to the employer and obtain approval.	Improvement opportunities identified during the interview will be described in this column.	
5.2	Information pertaining to the technology of the process.	1. Most of technology information should be developed during the EPC phase and delivered from the EPC contractor.		

Element 5: Information & Documentation

Our Strengths

- Extensive, worldwide EPC project and maintenance experiences
- Experience in investment for operating assets
- Professional Operation & Maintenance Engineer Teams
- Asset & Operation Management (AOM) system based on OSHA PSM
- Experience in Due Diligence (DD) and audits for operating plants.

OPEX Assessment

Do you have any of these issues?

- ☹️ **Estimating OPEX to assess the feasibility at business planning phase**
- ☹️ **Verifying future OPEX in operation phase**
- ☹️ **Identifying improvement opportunities on operation and maintenance costs**

Our Solution

- Estimate or Assess OPEX by experts who understand the processes and regions at business planning phase
- Analyze historical OPEX data from the operation phase
- Conduct a case study to identify the optimized OPEX in either of the above cases

OPEX Estimation based on Production Plan

O&M Strategy Development as the basis of OPEX (e.g., Organization Chart)

Workflow & Results

Business Planning Phase

Operation Phase

Our Strengths

- Assess using the latest cost information accumulated through plant EPC projects worldwide
- Estimate by experts with plant process, operation and maintenance knowledge
- Provide output tailored to client needs and business phases
- Advise improvement opportunities by experts

Our Experiences

10+
Projects in 10 years

**Various
Type of
Facilities**

Gas Processing
LNG Terminal
Onshore LNG
FLNG
FPSO, etc.

Strategic Operational Improvement Assistance

Do you have any of these issues?

- ☹️ **Increasing Unplanned Plant Outages**
- ☹️ **Increasing Maintenance Costs along with Age**
- ☹️ **Lack of Experienced Maintenance Staff**
- ☹️ **Representing Improvements Visually**

Solution

- SWOT Analysis of operation and maintenance organization
- Middle and long-term operation and maintenance plan including turnaround plan
- Setting Key Performance Indicators (KPI)
- Root Cause Analysis (RCA) for equipment failure and countermeasure development
- Training focusing on younger staff and skill/knowledge transfer from experienced staff

Strategic Operational Improvement Assistance

Technical Assistance
& Training menu

Long-Term Strategic Operational Improvement Assistance Program

Our Strengths

- Professional Operation and Maintenance Engineer Teams
- Global resources
- Practical application of Risk Based Work Selection process such as RCM and RBI
- Rigorous turnaround readiness review methodology
- Many experiences in turnaround planning
- Engineering tools and experienced analytical staff for RCA

Our Experiences Chemical Plant Case in Indonesia

Training and Competency Management Services

Do you have any of these issues?

- ☹️ **Catching up to the latest technical trends**
- ☹️ **Refreshing knowledge on essential technical matters**
- ☹️ **Specific training linked to technical issues**
(e.g., troubleshooting, performance improvement)
- ☹️ **Struggling to fill gap between actual and required skill set**

Training Services

- Organize a tailor-made training program
(e.g., Asset Management, Process Safety Management, TA Management, Plant Life Extension, etc.)
- Deliver training courses and seminars (at site or on-line)
- Implement competency management program
- Dispatch experts to site;
 - for hands-on training
 - for troubleshooting and performance evaluation with follow-up technical sessions

Training and Competency Management Services

Key Categories / Themes for Technical Training

Engineering & Project

P&ID
Hydraulic Design
Process Engineering
Dynamic Simulation Technology
Plant Safety Design and Risk Management
HAZOP
Material Selection
Piping Engineering
Pressure Vessel, Exchangers and Tanks
Energy Efficiency Improvement
Pump and Compressor
Instrument Engineering
Safety Instrumented Systems
Electrical Engineering
Civil Engineering
Welding Technology
Paint Technology
Corrosion under Insulation
Latest Non-Destructive Testing Technology
Vibration Control
Mechanical Handling
Commissioning
Operations Readiness & Assurance

Operation & Maintenance

Process Safety Management
Reliability, Availability, Maintainability (RAM)
Reliability-Centered Maintenance
Risk-Based Inspection
Plant Life Extension Program
Fitness for Service
Simulation Technology for Plant Troubleshooting (CFD)
Turnaround Management
Computerized Maintenance Management System
Computerized Inspection Management System

Our Strengths

- Professional Engineering Experts run our Training Services.
- Training programs are updated in line with latest technical trends and are applicable to actual implementation.
- In association with and funded by Japanese governmental support, such as JCCP (Japan Cooperation Center, Petroleum).
- Continuous follow-up and support are provided by our overseas affiliates and local partners.

Case Study : Customized Training for FCC Unit Reliability Improvement

[Return to
Technical Assistance
& Training menu](#)

Background:

A refinery in Southeast Asia was struggling with stable operation of RFCC unit from the start after EPC project

Attendees:

Maintenance and inspection departments and technical service departments at the plant site and headquarters

Objective:

To share information on various problems that occur in RFCC, analysis methods to solve them, and technical advice from refractory vendors.

Workshops are also held to share examples of problems encountered in their RFCC and to discuss how to plan the next turnaround maintenance.

Reference Services

Process Safety Management Seminar - JGC Headquarter 2016 for E&P Company in Japan

Plant Life Cycle Management Seminar - JGC Headquarter 2017 for E&P Company in Japan

Process Safety Management Seminar - Online 2021 for E&P Company in Japan

FCC Unit Integrity & Reliability Improvement Seminar– Online 2022 for Refinery in Middle East

FCC Unit Integrity & Reliability Improvement Seminar– Online 2023 for a Refinery in Southeast Asia

O&M Engineering Training – JGC Headquarter 2023 for a Petrochemical Plant in Middle East

FCC Unit Integrity & Reliability Improvement Seminar– Online 2024 for Refinery in South America

Examples of customized training programs

Material Degradation and Remaining Life Assessment (Day 1)

1. FCC Unit Process Overview
2. Material Selection and Degradation
3. Remaining Life Assessment Methodologies
4. Experience of Material Degradation and Current Issue (by Client)

Corrosion Management and Inspection Data Management (Day 2)

1. Corrosion Management Program
2. Corrosion Under Insulation
3. Inspection Data Management System
4. Corrosion Management Program and Improvement Plan (by Client)
5. Workshop - Corrosion Management Program (All members)

Fitness for Service and Major Replacement Work (Day 3)

1. Fitness for Service Technology
2. Major Replacement Work
3. Advanced Repair Technology
4. Past Experiences and Future Plans (by Client)
5. Workshop – Major Replacement and Repair Planning and Execution (All members)

Reliability of Critical Mechanical Components (Day 4)

1. Refractory (Vendor)
2. Expansion Joint (Vendor)
3. GRP Piping
4. Future Actions and Wrap Up (All members)
